DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-45, drawn to an apparatus and method for a washing machine with a control for a pulsator which brakes and releases said pulsator.

Group 2, claim(s) 46-56, drawn to an apparatus and method for a drum washing machine with a hot air supply means for supplying hot air into the drum to dry the laundry in the drum.

2. The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The shared technical features of Group 1 and 2 are: a tub of plastic, a rotatable drum, a hollow drum shaft, a bearing for supporting the drum shaft, a stator, a rotor, a pulsator, a pulsator shaft, and a pulsator control means.

3. Oae et al. (EP 1386995 A1) teaches a washing machine with a tub (Fig. 1, part 2) with a housing (Fig. 1, part 2) and front and rear suspension rods (Fig. 1, part 3 and 4); a pulsator (Fig. 1, part 7); a driving mechanism for the pulsator (Fig. 1, part 10) with dehydration shaft (Fig. 1, part 6), pulsator shaft (Fig. 1, part 9), and clutch for transmitting the power to motor (Fig. 1, part 8). Therefore all features of the

Art Unit: 1792

independent claim 1 are present except for a tub of plastic. However, the use of a plastic tub is inherent as one of ordinary skill in art would envisage a tub made of plastic as the selection of materials for a tub a well known in the art to be one of metal and plastic.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
